SPECTROCHIMICA ACTA

PART A: MOLECULAR SPECTROSCOPY

LIST OF CONTENTS AND AUTHOR INDEX

VOLUME 50A 1994

Editors

SIDNEY KETTLE, *Norwich, U.K.*

and

JEFFREY STEINFELD, *Cambridge, MA, U.S.A.*

PERGAMON

SPECTROCHIMICA ACTA
PART A: MOLECULAR SPECTROSCOPY

EDITORS

UNITED KINGDOM

Professor Sidney Kettle, School of Chemical Sciences, University of East Anglia, Norwich NR4 7TJ, U.K.

UNITED STATES OF AMERICA

Professor Jeffrey Steinfeld, Department of Chemistry, Massachusetts Institute of Technology, Cambridge, MA 02139, U.S.A.

ASSOCIATE EDITOR

Dr P. J. Hendra, *Department of Chemistry, University of Southampton, Southampton SO9 5NH, U.K.*

REVIEWS EDITOR

Professor Michael D. Morris, *Department of Chemistry, University of Michigan, Ann Arbor, MI* 48109-1055, *U.S.A.*

Production Editor: John Edginton, Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, U.K.

Publishing and Advertising Offices: Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, U.K. (Tel. (01865) 843000); and Elsevier Science Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.

One volume *per annum*. Published monthly plus additional issues in July and November.

Annual Institutional Subscription Rates 1995: North, Central and South America, U.S.$1416.00; Rest of World, £950.00. Associated Personal Subscription Rates are available on request for those whose institutions are library subscribers. Sterling prices exclude VAT. Non-VAT registered customers in the European Community will be charged the appropriate VAT in addition to the price listed. Prices include postage and insurance and are subject to change without notice.

Subscription enquiries from customers in North America should be sent to: Elsevier Science Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A., and for the remainder of the world to: Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, U.K. Second class postage paid at NEWARK, NJ, and additional mailing offices. Postmaster send address corrections to *Spectrochimica Acta Part A*, c/o Elsevier Science Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.

CONTENTS OF VOLUME 50A

No. 1 January

A. KADIRI, B. KABOUCHI, B. BENALI, C. CAZEAU-DUBROCA and G. NOUCHI: Study of the fluorescence of 9,9′-bianthryl in polyvinylalcohol and in polyvinylchloride at 300 K and 80 K 1

G. A. YEO and T. A. FORD: *Ab initio* molecular orbital calculations of the energetic, structural, vibrational and electronic properties of some hydrogen bonded complexes of water, ammonia and hydroxylamine 5

O. ZAKHARIEVA, H. FÖRSTER and M. TURNEVA: Normal coordinate analysis of deutero propenes in the free and zeolite-adsorbed state 19

RITA CASULA, GUIDO CRISPONI, FRANCO CRISTIANI, VALERIA NURCHI, MARIANO CASU and ADOLFO LAI: Study of the copper(II)–Aztreonam™ system by potentiometry and spectrophotometry, and structural characterization by ^{13}C NMR relaxation. 29

E. SÁNCHEZ DE LA BLANCA, M. V. GARCÍA and D. TROITIÑO: Study of solvent effects in association and rotational equilibrium in haloacetamides. 41

Z. KRIVÁCSY and J. HLAVAY: Optimization of sample packing in diffuse reflectance infrared spectroscopy 49

RUPERT BAUER, GÜNTER HEISLER and CHRISTIAN KÖNIGSTEIN: On the syntheses and photochemical properties of heterocyclic ketones as photosensitizers. 57

M. CASTELLÁ-VENTURA and E. KASSAB: Comparative semiempirical and *ab initio* study of the harmonic vibrational frequencies of aniline—I. The ground state 69

MANUEL DAUCHEZ, PHILIPPE DERREUMAUX, PHILIPPE LAGANT, GÉRARD VERGOTEN, MAJDA SEKKAL and PIERRE LEGRAND: Force-field and vibrational spectra of oligosaccharides with different glycosidic linkages—Part I. Trehalose dihydrate, sophorose monohydrate and laminaribiose 87

MANUEL DAUCHEZ, PHILIPPE LAGANT, PHILIPPE DERREUMAUX, GÉRARD VERGOTEN, MAJDA SEKKAL and BERNARD SOMBRET: Force field and vibrational spectra of oligosaccharides with different glycosidic linkages—Part II. Maltose monohydrate, cellobiose and gentiobiose 105

MEDINI KANTA PAL and JIMUT KANTI GHOSH: Circular dichroic and spectrophotometric probes of the competitive binding of crystal violet between DNA and other anionic polymers 119

KARLA SCHENZEL und KARL HASSLER: Synthese, Kernresonanzspektren und Schwingungsspektren der Hexamethyltrisilane und Pentamethyltrisilane $(XMe_2Si)_2SiMe_2$ und $(XMe_2Si)_2SiMeX$ (X = H, F, Cl, Br, I, Ph, OMe) 127

KARLA SCHENZEL und KARL HASSLER: Bromdisilan: Verbesserte Synthese, Schwingungsspektren und Normalkoordinatenanalyse 139

A. A. STOLOV, D. I. KAMALOVA, M. D. BORISOVER, B. N. SOLOMONOV and A. B. REMIZOV: Hydrogen bonds formed by methyl groups of acetonitrile: infrared and calorimetric study 145

IAN R. DUNKIN and ADAM MCCLUSKEY: A spectroscopic study of the reaction of the carbene, tetrabromocyclopentadienylidene, with O_2 in low temperature matrices. 151

R. MIRANDA, L. SANTANA, E. URIARTE and G. ZAGOTTO: NMR study of some coumarins and furocoumarins methylated 161

PER WAABEN HANSEN and PALLE WAAGE JENSEN: Vibrational studies on bis-terpyridine-ruthenium(II) complexes 169

Short Notes

A. K. RAI and A. K. SINGH: Ultraviolet and visible absorption spectral study of some mint oils 185

B. P. DWIVEDI and B. N. KHANNA: Investigation of cadmium borate glasses by Raman spectroscopy. . 186

Book Reviews 187

Announcement 189

Papers in Press i

No. 2 February

NORMAN C. CRAIG, SUSAN E. HAWLEY, LAC V. LEE and ANN PEARSON: Vibrational spectra and assignments for *trans*-3,4-difluorocyclobutene 191

R. COSTANZO, T. DE PAOLI, J. E. IHLO, A. A. HAGER, H. A. FARACH, C. P. POOLE, JR and J. M. KNIGHT: ESR study of order and dynamics in lecithin liposomes with high cholesterol content 203

I. R. DUNKIN and A. MCCLUSKEY: Carbonyl cyanide *O*-oxide, the adduct of dicyanomethylene and dioxygen in argon matrices at 12 K 209

MARTIN YSTENES: Scaled quantum mechanical (SQM) vibrational analysis of monomeric silicon dioxide and its dimer 2,4-dioxo cyclodisiloxane Si_2O_4 219

MARTIN YSTENES, FRANK MENZEL and WOLFGANG BROCKNER: *Ab initio* quantum mechanical calculations of energy, geometry, vibrational frequencies and IR intensities of tetraphosphorus tetrasulphide, α-$P_4S_4(D_{2d})$, and vibrational analysis of As_4S_4 and As_4Se_4 225

MARTIN YSTENES, ERLING RYTTER, FRANK MENZEL and WOLFGANG BROCKNER: Scaled quantum mechanical (SQM) vibrational analysis of $AlCl_3$, Al_2Cl_6 and the free ion $AlCl_4^-$ 233

K. HASSLER: Schwingungsspektren und Normalkoordinatenanalysen der Penta- und Tetrahalogendisilane $X_3SiSiHX_2$ und X_3SiSiH_2X, X = Br und I 243

RENÉ M. WILLIAMS and JAN W. VERHOEVEN: On the applicability of the Kasha–Vavilov rule to C_{60} . . . 251

H. G. M. EDWARDS, A. F. JOHNSON and E. E. LAWSON: A Raman spectroscopic study of *N*,*N*-dimethylacrylamide 255

N. S. GONÇALVES, L. F. C. DE OLIVEIRA and P. S. SANTOS: Raman, resonance Raman and infrared spectra of potassium uranyl croconate 263

CARLOS DE LA CRUZ and NORMAN SHEPPARD: An exploration of the surfaces of some Pt/SiO_2 catalysts using CO as an infrared spectroscopic probe 271

A. SCHRIVER, S. RACINE, O. SCHREMS and L. SCHRIVER-MAZZUOLI: Infrared induced conformational change in the two strong hydrogen bonded complexes 2–1 between dimethylether and hydrogen iodide in nitrogen matrix 287

PETER BIGLER and CHRISTIAN MÜLLER: Assignment of ^1H signals in complex overlapping spectral regions using proton-detected 2D heteronuclear shift correlation spectroscopy 297

DIETER KLAPSTEIN and WERNER M. NAU: Spectroscopy of acyl and carbonyl isocyanates. 307

MINORU AKIYAMA and TOSHIAKI OHTANI: Hydrogen bonding of *N*-methylacetamide in $CDCl_3$ solution studied by NMR and IR spectra 317

R. DE, S. BHATTACHARYYA and T. GANGULY: Investigation of excited state electron-transfer reactions. A search for other associative processes 325

M. IKRAM, M. A. RAUF and Z. JABEEN: Solvent effect on Si–H stretching bands of substituted silanes . 337

T. CHIAVASSA, P. VERLAQUE, L. PIZZALA and P. ROUBIN: Vibrational studies of methyl derivatives of malonaldehyde: determination of a reliable force field for β-dicarbonyl compounds 343

I. NOVAK, S. C. NG and A. W. POTTS: Photoelectron spectroscopic study of sulfur–sulfur interactions in macrocyclic thioethers 353

N. NETO, M. MUNIZ-MIRANDA and G. SBRANA: Vibrational analysis and molecular structure of bipyrazine 357

Short Note

SAMUEL MATHEW, SHABBIR AHMAD and P. K. VERMA: FT-Infrared and laser Raman spectra of *p*-nitroacetanilide. 369

Research Notes

J. GUILLERMO CONTRERAS, GLORIA V. SEGUEL and JOEL B. ALDERETE: The vibrational spectra of some 2-mercaptopyrimidine complexes of mercury(II) 371

E. G. FERRER and E. J. BARAN: The infrared spectrum of $VO(OH)_2$ (synthetic duttonite). 375

Book Review 379

Announcement 381

Papers in Press i

No. 3 March
Special Issue: Spectroscopy in South Carolina—Part 2

H. M. Badawi, Goran Baranovic, P. Groner, Mengzhang Zhen and J. R. Durig: Raman spectra, conformational stability, structural parameters, vibrational assignment, and *ab initio* calculations for epifluorohydrin 383

J. R. Durig, H. V. Phan, M. Mamula Bergana, M. S. Rollins, J. M. Gulick, J. D. Odom and S. D. Hudson: Infrared and Raman spectra, conformational stability, barriers to internal rotation, *ab initio* calculations and vibrational assignment of ethyl methyl selenide 399

Qiong Wang, Howard D. Stidham and F. Papadimitrakopolos: A spectroscopic study of model urethanes 421

J. F. Sullivan, H. L. Heusel, W. M. Zunic, J. R. Durig and Stephen Cradock: Structure, vibrational assignment, normal coordinate analysis, and *ab initio* calculations of methylisocyanate 435

Krešimir Furić, Mile Ivanda, Jasna Kučar Kopić and Vlasta Mohaček: Remarkable increase of organic particles in the atmosphere above Croatia 449

J. R. Durig, Young Hae Kim, G. A. Guirgis and J. K. McDonald: FT-Raman and infrared spectra, r_0 structural parameters, *ab initio* calculations and vibrational assignment for nitryl chloride. 463

H. D. Bist, H. Ning, T. Datta, T. S. Little and J. R. Durig: Techniques for obtaining far infrared transmission spectra of high T_c superconductors and related synthetic percursors. 473

C. J. Wurrey, Y. Y. Chien, F. G. Rojas, P. M. Green, A. J. Holder, R. C. Kenton, V. F. Kalasinsky, Ming-Tsu Ho, Chun-Fu Su and Robert L. Cook: Vibrational and rotational spectra and conformational behavior of (chloromethyl)thiirane. 481

Elisabeth T. Kintner, Joseph V. Nardo and John H. Dawson: Magnetic circular dichroism spectroscopy of zinc(II) tetraphenylporphyrin–ligand complexes: the effect of the axial ligand on spectral properties 493

Ying-Sing Li and San Li: FTIR spectra of $HSCH_2CH_2SH$, CH_3SCH_2SH, and CH_3SSCH_3 in argon and nitrogen matrices 509

T. J. Hizer, J. J. Rizzolo, J. L. Ives and J. R. Durig: Analysis of torsional spectra of molecules with two internal C_{3v} rotors—XXVI. A far infrared study of 1,1-dimethylhydrazine. 521

Dan Rosson, Charles A. Lewis, Jr, Paul D. Ellis and R. Bruce Dunlap: Fluorine-19 nuclear magnetic resonance and biochemical characterization of fluorotyrosine-labeled-thymidylate-synthetase 539

Richard S. Freedlander, R. T. Parker and R. Bruce Dunlap: Phosphorescence studies of folate . . 551

J. B. Cooper, J. Aust, C. Stellman, K. Chike, M. L. Myrick, R. Schwartz and M. Longmire: Raman spectroscopy with a low-cost imaging CCD array 567

E. L. Raleigh, J. B. Cooper, P. T. Chou, J. D. Noll and M. L. Myrick: Ultraviolet-absorbance measurement using a fluorescent transduction mechanism 577

D. T. Durig, Howard Z. Qiu, Mengzhang Zhen, T. S. Little and J. R. Durig: Microwave and far-IR spectra, conformational stability, molecular structure, barriers to internal rotation and *ab initio* calculations for the anticlinal conformer of *trans*-1-fluoro-2-butene. 583

Aiying Wang, T. S. Little and J. R. Durig: Spectra and structure of small ring compounds. LXII. Conformational stability, structural parameters, *ab initio* calculations and vibrational assignment of cyclopropylmethyl ketone 595

J. R. Durig, Young Hae Kim and T. S. Little: Conformational stability of trivinylborane from vibrational spectra and *ab initio* calculations 609

Mohammad A. Qtaitat, Abu Bakar Mohamad, Tarek A. Mohamed, D. J. Gerson, A. Q. McArver, M. S. Afifi and J. R. Durig: Spectra and structure of silicon-containing compounds. XVII. Vibrational and microwave spectra, molecular structure, barrier to internal rotation and *ab initio* calculations of methyltrichlorosilane 621

J. S. Church, J. R. Durig, Tarek A. Mohamed and Abu Bakar Mohamad: Spectra and structure of silicon compounds. XVII. Raman and infrared spectra and vibrational assignment for hexamethyldisilane and *ab initio* calculations for disilane and hexamethyldisilane 639

List of Special Issues. 661

No. 4 April

Qing-Shi Zhu, A. Campargue and F. Stoeckel: A high resolution spectroscopic study of SiH_4 $v = 6$ and 7 overtones 663

Mohamad M. Ayad: A spectrophotometric study of charge transfer complexes of thianthrene 671

F. Wuzen, A. Rulmont and P. Tarte: Origin of spurious bands in the infrared spectrum of Ba_2TiO_4 . 677

L. A. Solovieva, S. Kh. Akopyan and E. Vilaseca: Determination of ion association constants by means of IR absorption band intensities of the molecules forming the first coordination spheres of the cations 683

Peter S. Belton and Kevin M. Wright: Design considerations for a multiplexed spectrometer capable of simultaneous acquisition of multiple sample spectra. 689

M. del Arco, S. R. G. Carrazán, C. Martín, I. Martín and V. Rives: A FTIR assessment of surface acidity and dispersion of surface species in titania and alumina-supported molybdena 697

J. C. Merlin, J. P. Cornard, A. Stastoua, M. Saidi-Idrissi, M. F. Lautie and R. Brouillard: Vibrational analysis of hydroxyflavylium derivatives by IR, Fourier transform Raman and resonance Raman spectroscopies. 703

D. Basak and J. Ghose: Infrared studies on some substituted copper chromite spinels 713

Hector Boggetti, Jorge D. Anunziata, Rosa Cattana and Juana J. Silber: Solvatochromic study on nitroanilines. Preferential solvation vs dielectric enrichment in binary solvent mixtures. 719

Maria Angeles Monge, Enrique Gutierrez Puebla, Jose Elguero, Catherine Toiron, Wim Meutermans and Isabel Sobrados: An X-ray and ^{13}C CP/MAS NMR study of C,C-linked bipyrazoles and bispyrazolylmethanes. 727

J. Bardakji, G. Kontaxis, H. Sterk and R. Janoschek: On the estimation of an unexpected large chemical shift anisotropy. 735

K. M. Stephens and S. H. Bauer: Infrared emissions from shock heated hydrocarbons 741

Eric Faulques, Richard E. Russo and Dale L. Perry: Raman studies of uranyl nitrate and its hydroxy bridged dimer. 757

T. D. Klots, R. D. Chirico and W. V. Steele: Complete vapor phase assignment for the fundamental vibrations of furan, pyrrole and thiophene 765

W.-H. Chen, J. Gao, K. E. Rieckhoff and E. M. Voigt: Tautomeric relaxation rates in the ground state of tetra-4-tertiary butylphthalocyanine in Shpol'skii matrices 797

H. G. M. Edwards, D. W. Farwell and A. C. Williams: FT-Raman spectrum of cotton: a polymeric biomolecular analysis 807

C. L. Sigüenza and P. F. González-Díaz: Monochromatic two beam multiphoton dissociation of CF_2HCl 813

R. D. Dennehy, C. D. Dyer, W. F. Maddams and R. J. Whitby: Fourier transform Raman spectroscopy of novel organic systems. The analysis of allenylketenimine–tetracyanoethylene Diels–Alder reaction products. 819

Short Notes

S. Zameeruddin, B. A. Sastry, G. Ponticelli and M. Massacesi: Spectroscopic properties of some mixed bidentate diamine square planar metallic complexes 833

Mohamed M. Aly and Joseph J. Stephanos: Factors involved in the electronic mobility within the chelate ring of the linkage isomers of Co(II), Ni(II) and Cu(II) complexes with vicinal oxime–imine ligands; an IR study. 835

Papers in Press i

No. 5 May

F. E. G. Henn, G. M. Cassanas, J. C. Giuntini and J. V. Zanchetta: Studies of the H-bonds in sodium hydrogen malate by IR and NMR spectroscopy, and by proton conductivity measurements 841

A. Kadiri, M. Fadouach, B. Benali and A. Boucetta: Comparaison par une étude en spectroscopie UV des effets de complexation par liaison hydrogéne et de *N*-éthylation sur les spectres d'absorption du carbazole 851

TSE YUEN KOH, SARAH J. GREAVES and WILLIAM P. GRIFFITH: Vibrational spectra of 1,2-diaminobenzene, 4,5-dimethyl-1,2-diaminobenzene and catechol and their SER spectra 857

HERTWIG VRANKEN, JOHAN SMETS, GUIDO MAES, LESZEK LAPINSKI, MACIEJ J. NOWAK and LUDWIK ADAMOWICZ: Infrared spectra and tautomerism of isocytosine; an *ab initio* and matrix isolation study 875

JAMES H. CLARK, CHRISTOPHER J. LOCKE and MICHAEL S. WHITE: Medium control in a competitive hydrogen bonding system 891

K. GOBBATO, C. O. DELLA VÉDOVA and H.-G. MACK: Vibro-conformational behaviour and normal coordinate analysis of fluorocarbonyl isocyanate, FC(O)NCO. 897

IVOR WHARF: The assignment of the Raman and far-infrared spectra of Ph_3SnX(X = Cl, Br, I) and Ph_4Sn; a reaffirmation 903

JUAN ROBERTO ANACONA: Laser magnetic resonance spectra of $^{14}N^{34}S$ ($X\ ^2\Pi_{3/2}$) at 570.6 μm 909

JOSEPHINE A. ELLWOOD, DEREK STEELE and DONALD GERRARD: Vibrational absorption intensities in chemical analysis—VIII. Dimethyl sulphide 913

JIAN CHEN, JI-MING HU, ZHI-SAN XU and RONG-SHENG SHENG: Surface-enhanced Raman spectroscopy of free bilirubin and bilirubin complexes with transition metals iron(II), nickel(II) and cobalt(II) . . . 929

C. BALO, F. FERNÁNDEZ, C. GONZÁLEZ and C. LÓPEZ: ^1H NMR spectra of monosubstituted phenanthrenes 937

A. PARDO: Effective rotational potentials for the $X^1\Sigma_g^+$ state of the H_2 molecule 941

J. GEORGES and J. M. MERMET: Measurement of thermal energy recovery using thermal lens spectrometry in fluorescence quenching experiments 953

P. LAGANT, G. VERGOTEN, R. EFREMOV and W. L. PETICOLAS: Normal coordinate treatment of 1-methylthymine in the crystalline state: use of the ultraviolet resonance Raman intensities to improve the vibrational force field 961

C. ANGELIÉ: Fluorescence from SF_6 in highly excited vibrational states: an overview. 973

WEIWEI HUANG, RALPH A. WHEELER and ROGER FRECH: Vibrational spectroscopic and *ab initio* molecular orbital studies of the normal and ^{13}C-labelled trifluoromethanesulfonate anion 985

Short Notes

PETER TANNER and M.-Y. SHEN: Superparameterization of low-temperature vibrational data for lanthanide hexahalide anions 997

RAM A. LAL, ALAKNANDA N. SIVA, LALIT M. MUKHERJEE, RAM K. THAPA, KRISHAN K. NARANG and MEENA K. SINGH: ^1H NMR spectral evidence for the chair conformation in mono- and bis-(dioxouranium(VI)) complexes of bis(*o*-hydroxynaphthaldehyde)oxaloyldihydrazone 1005

H. BAN-OGANOWSKA: The analysis of the substituent and polarity solvent effect on the electronic absorption spectra of 3-halo-2,6-dimethylpyridine *N*-oxides and their 4-nitroderivatives 1007

MOEIN B. SAYED: Spectral analysis of highly symmetric azo phenol, catechol, resorcinol, quinol and pyrogallol derivatives of melamine 1009

Book Reviews 1011

Papers in Press i

No. 6 June

L. GRAJCAR, M. H. BARON, S. BECOUARN, S. CZERNECKI, J. M. VALERY and C. REISS: Selective site deuteration on the sugar ring as an efficient marker of conformation in nucleosides: the C–D stretching mode of the (2′-R)-[2′-^{2}H]-2′-deoxyuridine and its 3′,5′-O-(1,1,3,3-tetraisopropyldisiloxan-1,3-diyl)-derivative 1015

K. KNEIPP: Ion-induced SERS of dye molecules on very small silver colloids in aqueous solution . . . 1023

WAGNER J. BARRETO, DIMAS A. M. ZAIA and LUIZ FERNANDO C. DE OLIVEIRA: The interaction of *p*-benzoquinone with amino acids in the solid state: a spectroscopic investigation 1031

WALTER J. BALFOUR, SCOTT G. FOUGERE, DIETER KLAPSTEIN and WERNER M. NAU: The infrared and Raman spectra of carbonyl diisocyanate. 1039

CHRISTIANE PHILIPPINI FERREIRA BORGES and MARCEL TABAK: Spectroscopic studies of dipyridamole derivatives in homogeneous solutions: effects of solution composition on the electronic absorption and emission 1047

KEN OHWADA and KAZUYA SUZUKI: Application of potential constants: electronic chemical potentials of polyatomic molecules—VIII 1057

DELONG ZHANG, GUOXIANG LAN, SHIFEN HU, HUAFU WANG and JIMIN ZHENG: Raman spectra of 3-methyl-4-nitropyridine-N-oxide single crystal 1065

HANS BETTERMANN: The quantitative determination of the S_0–T_1 absorption in pyrene with the use of intracavity absorption spectroscopy 1073

M. J. NOWAK, H. ROSTKOWSKA, L. LAPINSKI, J. S. KWIATKOWSKI and J. LESZCZYNSKI: Experimental matrix isolation and theoretical *ab initio* HF/6-31G(*d*, *p*) studies of infrared spectra of purine, adenine and 2-chloroadenine. 1081

C. DELPECH, J. C. GUILLEMIN, P. PAILLOUS, M. KHLIFI, P. BRUSTON and F. RAULIN: Infrared spectra of triacetylene in the 4000–220 cm^{-1} region: absolute band intensity and implications for the atmosphere of Titan 1095

C. KAYA: An analytical approach to obtaining a valid solution to the secular equations for *cis*-disubstituted octahedral metal carbonyls 1101

I. D. REVA, A. M. PLOKHOTNICHENKO, E. D. RADCHENKO, G. G. SHEINA and YU. P. BLAGOI: The IR spectrum of formic acid in an argon matrix. 1107

V. V. FOMICHEV and O. I. KONDRATOV: Vibrational spectra of compounds with the wolframite structure 1113

S. CASTILLO, J. FAVROT, TH. BOUISSOU, J. F. BRAZIER, M. T. BOISDON and A. ZWICK: Assignment of the vibrational spectra of 2(1H)-pyridinone (2-pyridone) in the solid state, and in solution as centrosymmetrical dimer. Comparison with 1-methyl-2(1H)-pyridinone (N-methyl-2-pyridone) 1121

ILSE WOLFS, HERMAN O. DESSEYN and SPIROS P. PERLEPES: Vibrational analysis of some hydroxyalkyl substituted oxamides. 1141

M. H. ABBAS and G. DAVIDSON: Vibrational spectra of $X_2O_7^{n-}$ anions 1153

ASHUTOSH SHARMA and NIGEL STUART MICHAEL QUANTRILL: Measurement of ethanol using fluorescence quenching 1161

ASHUTOSH SHARMA and NIGEL S. M. QUANTRILL: Measurement of glucose using fluorescence quenching 1179

Short Note

LIU GUOFA: Vibration spectra of complexes of rare earth nitrate with some Schiff bases. 1195

Technical Note

JUAN CARLOS STOCKERT, ANGELES VILLANUEVA, MAGDALENA CAÑETE and ANGELES JUARRANZ: Spectroscopic observations on photofading and fluorescence changes of eosin *Y* solutions in the presence of sodium azide 1197

Research Notes

KENJI TODORI, KENJI SANO, YASUSHI MORI and KIMIKO KOBAYASHI: Wavenumber shift of more than 20 cm^{-1} on CO vibration spectrum caused by conformational difference on polymorph in 2-cyano-3-(3,4-methylenedioxyphenyl)-2-propenoic acid 1201

C. SIGÜENZA, L. DIAZ, P. F. GONZÁLEZ-DIAZ, H. BÜRGER, H. BECKERS and J. POLA: Single and double IR laser multiphoton decomposition of trifluoromethylsilane 1207

SPECTROCHIMICA ACTA

PART A: MOLECULAR AND BIOMOLECULAR SPECTROSCOPY

NOTES FOR CONTRIBUTORS

General

The journal publishes *Letters*, full length *Papers*, *Review Articles* and *Notes*. All contributions should have clear scientific value and either report new data, procedures, equipment, or new theoretical considerations, as noted in the Aims and Scope for either "Molecular Spectroscopy" or "Biomolecular Spectroscopy".

Letters are meant for publication of important new results in concise form. *Letters* should not exceed the equivalent of 5000 words including figures and tables. Special attention will be given to ensure rapid publication of contributions accepted as *Letters*.

Papers should be complete and authoritative accounts of work which have special significance, general interest and which are presented clearly and concisely.

Review Articles are commissioned by the Editors on the advice of the Editorial Advisory Board. Authors wishing to submit a review article should contact an Editor or a member of the Board.

Short Notes are short descriptions of work of sufficient interest to justify publication but describing basically well established methodology and/or theory and therefore only available in full through the Deposited Documents scheme. These *Notes* should not exceed the equivalent of 3000 words including figures and tables.

The submission of a contribution for publication in *Spectrochimica Acta Part A* is held to imply that it has not previously been published in any language, that it is not under consideration for publication elsewhere, and that if accepted for publication it will not be published elsewhere without the written approval of the Editors and consent of the Publisher.

Submission of Contributions

Authors should submit their contribution to the appropriate section (Molecular Spectroscopy or Biomolecular Spectroscopy) as follows:

Molecular Spectroscopy

Typescripts should be submitted to one of the Editors: Professor Sidney Kettle or Professor Jeffrey Steinfeld.

Professor Sidney Kettle, School of Chemical Sciences, University of East Anglia, Norwich NR4 7TJ, U.K.
Fax +44 (1603) 507747

Professor Jeffrey Steinfeld, Department of Chemistry, Massachusetts Institute of Technology, Cambridge, MA 02139, U.S.A.
Fax +1 (617) 253 7030

Biomolecular Spectroscopy

Typescripts should be submitted to one of the Editors: Professor Arnold Hoff or Professor James Norris, or directly to an expert member of the Editorial Advisory Board for Biomolecular Spectroscopy. Final responsibility for acceptance or rejection always rests with the Editors.

Professor Arnold J. Hoff, Huygens Laboratory, Leiden University, Niels Bohrweg 2, PO Box 9504, 2300 RA Leiden, The Netherlands
Fax +31 (71) 275955/5700

Professor James R. Norris, Department of Chemistry, University of Chicago, 5735 S. Ellis Avenue, Chicago, IL 60637, U.S.A.
Fax +1 (312) 702 2879

The full addresses of Editorial Advisory Board members are given in the first issue of each volume of the journal.

Contributions may be written in English, French or German. For all papers an abstract in English must be provided.

All contributions must be written in English.

Typescripts may be submitted by fax but should be backed up by submission using normal mail. All authors are requested to include a note of their Fax number and/or E-mail address when submitting their typescript.

Format of Contributions

All contributions should be submitted in triplicate. They should be typed on one side of the page only, and the text should be double spaced with wide margins.

Authors should also submit a copy of any paper included in the references which is not yet published, e.g. "in press" or "submitted for publication". To minimize postal charges, submitted material is not in general returned to authors. Original drawings and photographs can be returned to an author if requested; otherwise these are discarded one month after publication.

In preparing their typescript authors are encouraged to familiarize themselves with, and to follow, the format of articles published in current issues of the journal.

Submission of contributions as camera-ready copy in correct journal format is welcomed. For detailed instructions see the guidelines on the preparation of CRC manuscripts given below.

Figures, including Photographs

The original line drawings or photographs for figures should be supplied with one of the copies of the typescript. Each figure should be clearly marked on the back with the names of the authors and the figure number.

Captions for figures should be typed on a separate sheet.

Line drawings should always be carefully prepared at about twice the final size, on plain white drawing paper, and suitable for direct reproduction. Laser printer output at 300 dots per inch for a two-to-one reduction on good quality paper is acceptable. Authors should take particular care to ensure that lettering on a figure will remain clearly legible after reduction.

Photographs should be enlarged sufficiently to permit clear reproduction. If words or numbers appear in photographs two copies are required, one with the words or numbers clearly overprinted and the other without inscription.

Tables

Each *Table* should be supplied on a separate sheet and should include a caption.

Tables should be so constructed as to be intelligible without reference to the text, every table and column being provided with a heading. Units of measure must always be clearly indicated. Unless it is essential to the argument, tables should not list the results of individual experiments, but should summarize results by an accepted method of expression (e.g. standard deviation). The same information should not be produced in both tables and figures.

Units

SI units are required.

Nomenclature

All nomenclature should conform as closely as possible to the rules established by IUPAC and IUPAP, as summarized in the following publications: N. Sheppard, H. A. Willis and J. C. Rigg, *Spectrochim. Acta* **43A,** 1 (1987); E. R. Cohen and P. Giacomo, *Physica* **146A,** 1–68 (1987); I. Mills *et al.*, *Quantities, Units and Symbols in Physical Chemistry*. Blackwell, Oxford (1988).

References

References should be indicated in the text by consecutive numbers in square brackets; the full references should be listed at the end of the paper in the following form:

[1] C. J. Pedersen, *J. Am. Chem. Soc.* **89,** 7017 (1967).
[2] J. D. Lamb, R. M. Izatt, J. J. Christensen and D. J. Eatough, in *Coordination Chemistry of Macrocyclic Compounds* (Edited by G. A. Melson), Chap. 1. Plenum Press, New York (1979).
[3] R. M. Izatt, J. S. Bradshaw, S. A. Nielsen, J. D. Lamb, J. J. Christensen and D. Sen, *Chem. Rev.* **85,** 271 (1985).
[4] R. D. Amos, *Advances in Chemical Physics* (Edited by I. Prigogine and S. A. Rice), Vol. 67, p. 99. Wiley, New York (1987).

Journal-name abbreviations should follow those given in the *World List of Scientific Periodicals*, 4th Edn.

Proofs, Reprints and Copyright

Proofs: Where multiple authors are concerned it is important to indicate, when submitting a contribution, the author to whom correspondence and proofs should be sent. Only essential corrections should be made at proof stage. Alterations to the text, other than printer's errors, may be charged to the author.
The publisher reserves the right to publish a contribution without waiting for corrected proofs to be returned by the author, if waiting would cause undue delay.
Reprints: No page charges are assessed and 25 free reprints will be provided to the principal author. Authors should indicate the number of additional paid reprints required when returning their proofs.
Copyright: Authors are requested to read the note on copyright published on the verso of the title page of each issue. Publication of a contribution may have to be delayed until a signed transfer of copyright agreement has been received. Authors are recommended to send the agreement at the same time as the proofs are returned.

Deposited Documents

From time to time, the journal receives manuscripts which contain extensive tabular or graphical data. While such data may be of archival interest, and should be available to workers in the field, it is often impractical to publish such material in its entirety. For this reason, the journal has entered into a supplementary data deposition scheme with the British Library Document Supply Centre, details of which have been given in the last page of *Spectrochim. Acta* **43A,** No. 6 (June, 1987). Authors are encouraged to avail themselves of this service when appropriate. Persons wishing to obtain copies of deposited material should write, citing the accession number, directly to Service Enquiries, British Library Lending Library, Boston Spa, Wetherby, West Yorks LS23 7BQ, U.K.

Preparation of Camera-ready Copy

Typescripts submitted and accepted as camera-ready copy benefit from substantially reduced publication times since the normal procedures of typesetting and proof-checking are bypassed. However, where the submitted copy is not of adequate quality or is not sufficiently close to the journal style, the Editors and the Publisher reserve the right to have the material typeset in the normal way. Authors are earnestly recommended to examine a copy of the journal for examples of the preferred style. The following guidelines may also be of assistance.

Typescripts should be on good quality A4 (29.7 × 21.0 cm) or U.S. letter (27.9 × 21.6 cm) size paper. Typescripts will normally be reproduced without reduction.
Ideally manuscripts should be laser printed using 10pt Times Roman fount, with a maximum of 56 lines text per page. The text should be in single column. All graphics must be inserted in text (if not printed directly then graphics should be glued in place, not taped). All graphics and text should be within an image area of 23.5 cm height and 13.5 cm width.

Suggested margin settings (in cm) are:

	LH margin	RH margin	Upper margin	Lower margin
U.S. letter	4.0	4.0	2.3	2.1
A4	3.8	3.8	3.2	3.0

Recommended fount settings are:

Title of the paper	12pt Times Roman Bold, centred.
Names of Author(s)	10pt Times Roman Capitals, centred.
Address(es) of Author(s)	8pt Times Roman, centred.
Abstract	8pt Times Roman.
Text	10pt Times Roman.
Section headings with subheadings in italics	10pt Times Roman Capitals.
Figure headings	8pt Times Roman.

Lettering on figures should be of appropriate size for reproduction after reduction.
References should be numbered in the text (in square brackets [ ]), and should be listed in numerical sequence (in 8pt Times Roman) at the end of the paper.
Where these suggestions for type size cannot be followed in detail, authors should above all ensure that they keep as closely as possible to the measurements given above for the image area of a page.

ELSEVIER SCIENCE!

Elsevier Science Limited Encourages the Submission of Articles on Disk

Delivery of Electronic Files

Authors may now submit accepted manuscripts on 3.5" or 5.25" disks.

Disks must be clearly marked with the following information:

Operating system
Disk format (e.g.DS/DD)
Word Processor used, including version number (users of T_EX see later)
Authors' names
Short title of article

Two printed copies of the final version of the manuscript should be submitted with the disk. In the event of differences between disk and hard-copy, the hard-copy will be considered as the definitive version.

Preparing Electronic Text Files

When using a word processor to prepare a manuscript the following should be noted:

Page design will be handled by the Publisher. There is therefore no need to use formatting commands such as centring, justifying text, indenting etc.
Use the word processor's facilities to indicate the following text attributes: bold; underline; italic; subscript; superscript; strikeout.
Do not use the hyphenation facilities of your word processor.
When preparing tables use tabs, not spaces, to align columns.
When using symbols to denote special characters please supply a list of all codes used.

Use "hard returns" (i.e. using the enter key) only at the end of paragraphs. Use your word processor's "word-wrap" feature within paragraphs.
It is essential that the printed versions supplied are produced directly from the submitted electronic version.

$LaTeX/TeX$

Authors wishing to submit their article as a $LaTeX/TeX$ file should note the following:
Authors should use the "Article" style or the Elsevier $LaTeX$ package which is available via anonymous FTP from CTAN centres.

Host names:	CTAN directory:
ftp.dante.de	/pub/tex/macros/latex209/contrib/elsevier
ftp.cam.ac.uk	/pub/archive/macros/latex209/contrib/elsevier
ftp.shsu.edu	/tex-archive/macros/latex209/contrib/elsevier

(Further details on TeX can be obtained from Martin Key)

Authors should not add their own macros.

Preparing Electronic Graphic Files

Illustrations ideally should be produced in the Macintosh environment using the following software packages:
(Please do not save images as postscript files)

Adobe Illustrator, Aldus Freehand, Cricket Graph, Macdraw, Chemdraw, Corel Draw-for PC

However we will accept any of the popular drawing programs for the Macintosh and PC.
Artwork should be drawn for finished size using a Times or Helvetica typeface at a final size of 8pt type with appropriate lineweights.
Please indicate format, operating system, program and version number of the software used. If possible also print a directory of filenames.
Scanned artwork should be saved to Tiff format for both line and half-tone and scanned at a suggested setting of 400 dpi for half-tones and 1000 dpi for linework. If it is necessary to compress the scans please indicate the software used. It is essential that a hard copy print of the scans be included.
Illustrations should be logically named and saved as individual files to 3.5" disk or a SyQuest cartridge 44mB or 88mB. If 3.5" disks are not available to you, 5.25" disks are acceptable. Please send a laser print of the artwork with the electronic file.
When submitting electronic colour images please indicate the file format and program used (including compression software). Include a 4 colour machine or cromalin proof and check that all the separations (if provided) are colour identified.
